

Ordinance of the State Government on Infection Protection Measures against the Spread of the SARS-CoV-2 Virus (Corona Ordinance – “CoronaVO”)¹

of 1 April 2022

(in the version valid from 2 May 2022)

On the basis of Art. 32 in conjunction with Arts. 28 to 31 and Art. 54 of the [German] Infection Protection Act (“IfSG”) of 20 July 2000 (Federal Law Gazette I, p. 1045), last amended by Article 4 of the Act of 18 March 2022 (Federal Law Gazette I, p. 473), it is decreed:

Art. 1

Objective

The Ordinance is intended to prevent the spread of the Corona Virus Disease-2019 (COVID-19), in particular to protect life and health and the functioning of the health system. In particular, the key measure of protective action is the number of COVID-19-related hospital admissions per 100,000 inhabitants over a seven-day period. Other indicators such as the number of new infections with the SARS-CoV-2 (Corona virus) per 100,000 inhabitants within seven days, differentiated according to infection epidemiological aspects, the available intensive medical treatment capacities and the number of persons vaccinated against COVID-19 are taken into account in the evaluation of the infection incidence. In the event of a significant worsening of the epidemic situation, the state government reserves the right to take additional measures on the basis of Art. 28a Paragraph 8 IfSG, as amended, following a resolution by the state parliament to that effect.
